Abstract: A systematic and comprehensive review of security and privacy-preserving challenges in e-health solutions indicates various privacy preserving approaches to ensure privacy and security of electronic health records (EHRs) in the cloud. This paper highlights the research challenges and directions concerning cyber security to build a comprehensive security

Security and Privacy-Preserving Challenges of e-Health ...

FairAccess has successfully achieved the following IoT's security and privacy-preserving requirements, fixed in the beginning of this chapter, that are: (1) Distributed nature and the lack of a central authority. User-driven and transparency. (2) Lightweightness. (3) Fine-granularity. (4) Identification enabling thing to thing interaction.

In this paper, we first discover pre-existing schemes have problems of huge storage space, security and low efficiency due to their inefficient and insecure algorithms. Then, we provide an effective and practical privacy-preserving scale-invariant feature transform (SIFT) scheme for encrypted image.
