Vertical Machining Centers. This series include box way, linear roller pack ways, gear head construction and double column design models for different machining requirements. FANUC Oi-MF control is used on all models.

### **Vertical Knee Mills - Sharp-Industries**

The Sharp mills have a knuckle which uses 6 bolts, 3 each side, fitted into circular T-slots with matching nuts securing them from the outside. It locks the head in place for better accuracy and performance than the old design using only 3 bolts to squeeze the casting to hold the head without the T-slots.
