Shipwrecks 100 Facts - rancher.budee.org

A shipwreck is the remains of a ship that has wrecked, which are found either beached on land or sunken to the bottom of a body of water. Shipwrecking may be deliberate or accidental. In January 1999, Angela Croome estimated that there have been about three million shipwrecks worldwide [1] (an estimate rapidly endorsed by UNESCO [2] [3] and other organizations [4]).

Shipwreck - Wikipedia

In 1997, the National Oceanic and Atmospheric Administration (NOAA) captured one of the loudest sounds ever recorded, which they named "The Bloop." The sound was loud enough to be picked up by sensors over 3,000 miles away. Originally, researchers noted that the nature of the sound made it seem like it came from an animal, although no known animal exists that is large enough to make that sound.
