Continuous Function Chart Getting Started

CFC (Continuous Function Chart) is a graphic editor that can be used in conjunction with the STEP 7 software package. It is used to create the entire software structure of the CPU from ready-made blocks. When working with the editor, you place blocks on function charts, assign parameters to them, and interconnect them.

SIMATIC CFC for S7 Continuous Function Chart

The CFC language (Continuous Function Chart) offers you the possibility of designing graphic interconnections for blocks. While working with the particular software, you can always consult the Online Help to get answers to detailed questions regarding the use of the editors/compiler.
