Our first dynamometers were developed in the late 1950s in Palo Alto, California when we were building systems to test basic go-kart engines. Today we bring you the Go Power D100 small engine dyno (dynamometer). The D100 allows you to test engines from 10 to 100 horsepower at engine speeds up to 14,000 rpm (with optional seal feed cooling kit) with durability and accuracy to meet even the most demanding industrial requirements.
