drop of detergent solution. Swirl gently and watch the solution for any bubbling.

A Catalyst and the Rate of Reaction - Middle School Chemistry

Students investigate the pH level of household substances by testing a variety of common compounds. Substances are tested with pH strips and placed on the continuum of the pH scale range of 1 to 14. After testing a solution, the student compares the strip color to the scale provided on the container and gives the solution a rating from 1-14.
