Strange evolution: The weird future of life on Earth - BBC

...

From fossil evidence, it appears that life may have existed on Earth as early as 3.5 billion years ago. This suggests that life must have evolved sometime during Earth's tumultuous first billion years. How did life evolve? And what did early forms of life look like? Some scientists believe that the answers may be hiding in our cells, in ...

Exploring Life's Origins: A Timeline of Life's Evolution

Evolution of Life on Earth. Evolutionary Biology is the study of history of life forms on earth. Homology indicates common ancestry. In the context of biology, homology is the existence of shared ancestry between a pair of structures, or genes, in different species.

timeline of evolution and a guide to biological classification. Over 250 plant, animal, and microbe species are arranged according to the most up-to-date taxonomy (domain, kingdom, phylum, order, family, and genus) in a beautiful, easy to follow "tree of life" format.

Evolution & Classification of Life - UsefulCharts

Evolution is the theory that all the kinds of living things that exist today developed from earlier types. The differences between them resulted from changes that happened over many years. The simplest forms of life arose at least 3.5 billion years ago. Over time they evolved into the millions of species, or types, of living things alive today.

evolution | Definition, History, Types, & Examples ...

(Genesis 3:20; 4:1) The Bible account does not support the theory that God used evolution to bring about the different kinds of life, sometimes called theistic evolution. The fact is, though, that nothing in the Bible conflicts with scientific observations that variations occur within each kind of life.

Did God Use Evolution to Create the Different Types of Life?

Evolution helps us to understand the history of life. The explanation Biological evolution is not simply a matter of change over time. Lots of things change over time: trees lose their leaves, mountain ranges rise and erode, but they aren't examples of biological evolution because they don't involve descent through genetic inheritance.
