The Great Transition Climate Disease

A major new account of the fourteenth-century crisis when climate change, disease and a transformation of the military and political balance of power reshaped the medieval world. Bruce Campbell reveals how these factors combined in a devastating succession of famines, floods, human and animal mortality, wars and financial crises.

The Great Transition: Climate, Disease and Society in the Late-Medieval World. Bruce M. S. Campbell. In the fourteenth century the Old World witnessed a series of profound and abrupt changes in the trajectory of long-established historical trends. Transcontinental networks of exchange fractured and an era of economic contraction and demographic decline dawned from which Latin Christendom would not begin to emerge until its voyages of discovery at the end of the fifteenth century.
