Course Description STAT 5302 is the second course in a two-semester sequence in Intermediate Data Analysis (5301- 5302). We assume that students are familiar with organizing and summarizing data, the nature of relationships between variables, sampling distributions and the underlying rationale for hypothesis tests and condence intervals.

The Starting Point At first glance, the first four chapters of The Statistical Sleuth appear to rehash the topics of one-sample and two-sample analysis, which are covered in introductory courses. This is not the case. These chapters are intended as a model for how topics in the rest of the book are treated.
