Contrast Control with Variable Contrast Paper I mentioned earlier than there are two main types of paper, and variable contrast is the second type. VC paper, as it's called, allows you to produce a variety of contrasts using the same paper. You do this buy changing the color of the light you project onto the paper.

Understanding Contrast Control in the Darkroom

This is a very powerful technique that can be used routinely with variable contrast (VC) papers, such as ILFORD MULTIGRADE. It makes use of the differing performance produced by combining low contrast and high contrast exposures in the same print.
