that investigates the interaction of surfaces in relative motion in the form of friction, wear, lubrication and other design aspects of materials science. These concepts of tribology have several practical implications in our everyday lives. For example, the friction between our feet and the ground allows us to walk and drive each day.

Tribology Tribology is the science and application of the principles of friction, wear and lubrication. The word tribology derives from the Greek root τριβ- of the verb τρίβω, tribo, which means “rub” and the suffix -logy from -λογία, -logia, which means “study of” or “knowledge of”.
