dynamics of child sexual abuse differ from those of adult sexual abuse. In particular, children rarely disclose sexual abuse immediately after the event.

Moreover, disclosure tends to be a process rather than a single episode and is often initiated following a physical complaint or a change in behaviour.

- **WHO**

Child sexual abuse is any interaction between a child and an adult (or another child) in which the child is used for the sexual stimulation of the perpetrator or an observer. Sexual abuse can include both touching and non-touching behaviors. Non-touching behaviors can include voyeurism (trying to look at a child's naked
