Like the individual organism, the population is a real and functional unit in biology. Defined as groups of organisms that are genetically and spatially distinct from other such groups, the population is the fundamental unit of evolution. Populations are dynamic, they grow, decline, colonize new populations, and go extinct.

Virtual Lab: Population Biology. Shannan Muskopf June 5, 2016. This lab uses the glenco simulator, Virtual Lab: Population Biology to collect data on two populations of paramecium, *P. caudatum* and *P. aurelia*. Though the simulator doesn't expressly say it, the activity illustrates the competitive exclusion principle by showing students how each
