A good example of this is net convergence, a topic that in my opinion, ought to be treated in any introductory topology course. In fact, Willard's development of nets makes for a nice, quick proof of the Tychonoff Theorem while Munkres's approach necessitates the development of a few technical lemmas. ... A colleague lent me his favorite, Stephen Willard's General Topology, published in 1966, and I dug up my old copy of Kelley (also General Topology), which appeared in 1955 and from which I originally learned topology. Each text has its own way of doing things; in particular, there were more differences than similarities in the orders in which ...
