Welcome to my.KUKA, In this protected area, you can easily access your my.KUKA applications - exclusively for you and securely encrypted.

## Login - KUKA

The KUKA.DeviceConnector (KDC) is a software-based connectivity solution installed on the robot controller. While at your facility, data from the controller is encrypted using TLS v1.0 and sent to a customer-owned device running KUKA data transmission software (an "intermediate broker").

## Connecting and Onboarding Robots | KUKA Connect

WorkVisual is the configuration tool for KUKA robots, it is not the simulation environment (that would be KUKA SimPro, KUKA|prc of course also simulates robots). So it will be important for you during setup, but probably not really something you will need on a daily basis.
